CARD CONTROLS

From the home screen of your mobile app, click on the 3 lines in the bottom right corner of the screen labeled "MORE," then select "Card Controls."

Select the card you want to manage.

Clicking "location controls" will allow you to manage which regions the card may be accepted in. You can also choose to block all international transactions for added security.

Note: If you're planning a trip please contact us so we may place your card on travel status.

"Threshold amount" allows you to set your own maximum threshold for purchases. You cannot exceed the limit already set by the bank, but you can lower it for your own security.

Set a monetary threshold for purchases. Transactions that exceed the threshold are declined. This will not override the card limit set by the bank.
